

ENABLING HAND HYGIENE

AT THE CRITICAL
POINT-OF-CARE

Compliance Within Arms Reach:

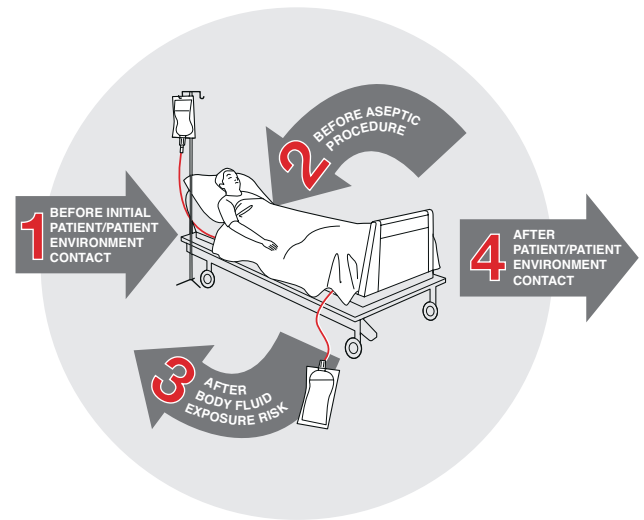

- Eliminates barriers to enable hand hygiene within the patient care workflow
- Improves staff compliance with Public Health and WHO hand hygiene standards
- Flexible mounting options for a variety of placements within the patient zone

The World Health Organization defines point-of-care as the place where three elements come together¹:

- The patient
- The healthcare worker
- Care or treatment involving contact with the patient or his/her surroundings within the patient zone

With the point-of-care dispenser, SC Johnson Professional™ has made it easy for healthcare workers to sanitize at each of the Your Four Moments for Hand Hygiene - before, during and after providing patient care, putting hand hygiene compliance within reach.

Your 4 Moments for Hand Hygiene, adapted by Public Health Ontario from the World Health Organization (WHO) guidelines for hand hygiene in healthcare.

Clinical Workflow Efficiency

The point-of-care dispenser easily mounts to walls, over-bed, and bedside tables to bring ABHR within arms reach and enable proper hand hygiene at the point of direct patient care, without interrupting clinical workflow.

Patient Safety Features

Flexible mounting options and tamper-proof locking features safely bring ABHR into the patient zone while protecting the enclosed product from misuse, theft, and being misplaced.

Safe Environment

The smaller volume 400 mL bottle allows for more sanitizing stations, and improved access to hand hygiene products, while still meeting fire code regulations.

1 Table Top Mount - White (for point-of-care dispenser)
Stock # 400ML-TMW

2 Table Top Mount - Red (for point-of-care dispenser)
Stock # 400ML-TMR

3 Point-of-Care Dispenser - White
Stock # 400WH

4 Point-of-Care Dispenser - Red
Stock # 400RED

5 USE WITH
400mL Microsan Encore Foaming 72% Alcohol Handrub
Stock # 804
